

# PREMIUM INDIAN TONIC WATER

*with* QUININE & MEXICAN BITTER ORANGE OILS

By blending luscious botanical oils from Mexican Bitter Oranges with spring water and quinine of the highest quality from the 'fever trees' from the eastern hill ranges of the Democratic Republic of Congo, we have created a delicious, award-winning tonic water.

**NO ARTIFICIAL FLAVOURS,  
SWEETENERS OR COLOURS.**

## INGREDIENTS & PROVENANCE

Quinine is the key ingredient that creates the gentle bitterness in tonic water and is harvested from one of the only remaining plantations of original Cinchona trees which produce some of the highest quality quinine in the world.

Our Indian Tonic Water still uses quinine from the deep forests of the Democratic Republic of Congo, found by Tim and Charles on one of their first trips.
